MARKET REVIEW

Deliveries of sugar for U. S. consumption from January 1 through November 17, 1962 totaled 8,600,000 tons or 76,000 tons more than for the same period last year. Cane sugar refiners deliveries exceed those of last year by 299,000 tons but deliveries by beet sugar processors are down 208,000 tons.

Sugar deliveries during the final six weeks of 1961 totaled 1,087,000 tons or about 181,000 tons per week, the same volume as delivered during the week ending November 17, 1962. Beet sugar deliveries during the latter part of 1961 averaged 48,000 tons per week or about 5,000 tons more than the recent level of beet sugar deliveries.

Beet sugar deliveries in 1962 through October were down 196,000 tons, raw value, from those of the previous year to the same date. Through September 1962 they were down 186,000 tons, raw value, or 3,473,000 cwt. refined value. Deliveries by states for January-September are published in this issue of Sugar Reports. The following table shows the states where the major declines in beet deliveries occurred as well as the changes in cane sugar deliveries for those states.

Changes in Beet and Cane Sugar Deliveries, January-September 1962  
as compared with January-September 1961  
1000 cwt. refined

	<u>Beet sugar</u>	<u>Cane sugar</u>	<u>Total</u>
Ohio	-1,301	+1,146	-155
Michigan	- 482	+ 356	-126
Pennsylvania	- 418	+ 262	-156
New York	- 290	+ 444	+154
Indiana	- 257	+ 442	+185
Total 5 states	<u>-2,748</u>	<u>+2,650</u>	<u>- 98</u>
Illinois	- 127	+ 756	+629
California	- 119	+ 634	+515
Other states	- 479	+ 161	-318
Total U.S.	<u>-3,473</u>	<u>+4,201</u>	<u>+728</u>

Over 79 percent of the decrease in beet sugar deliveries was in five eastern states that are in the freight absorption territory for western beet sugar processors. Less than 10 percent of the change is traceable to reduced inventories of Michigan and Ohio factories. Cane sugar deliveries to these five eastern states did not quite offset the decreased deliveries of beet sugar. While beet sugar deliveries to Illinois and California were not down significantly, these two states are shown in the table to highlight the increased cane sugar deliveries to these most competitive marketing states. Total deliveries of cane and beet sugar to Illinois and California were up 1,144,000 cwt. Total deliveries to all other states were 416,000 cwt. below those of last year during January-September, as a result of a decrease of 3,227,000 cwt. in beet sugar deliveries to states other than Illinois and California and an increase of 2,811,000 cwt. for cane sugar.

Wholesale refined sugar price quotations are unchanged since the last Sugar Report. As of November 23, the quoted prices were as follows:

	<u>Cane</u> cents per lb. in 100 lb. bags	<u>Beet</u> cents per lb. in 100 lb. bags
Northeast	9.70	
New York metropolitan area	9.60	
Southeast	9.20	
Gulf	9.00	
Eastern beet		9.15
Chicago-West	9.20	9.00
Chicago Switching District (delivered)	9.60	9.40
Lower Pacific Coast	9.20	9.20
Oregon-Washington	9.00	9.00
Mountain States	9.10	9.00

The spot price of raw sugar at New York averaged 6.42 cents per pound from November 1-23 and has averaged 6.44 cents from January 1-November 23, 1962, compared with 6.29 cents for the same period of 1961. The wholesale refined price of sugar in the Northeast has averaged 9.59 cents per pound from January 1 - November 23, 1962, or 0.14 cent higher than during a comparable period last year.

The market for world sugar as quoted by the New York Coffee and Sugar Exchange has been very active in the past few weeks. The October average price was 3.28 cents per pound, the high having been 3.55 cents

per pound on October 23 and the final quotation 3.50. The world sugar price stood at 3.50 cents for the first 10 days of November and then advanced very rapidly to 3.80 cents on the 20th. On November 23 all 1963 futures positions closed above four cents.

Crop conditions in Europe and the sugar and political situation in Cuba no doubt were the principal factors affecting the market. On November 15 Cuba released figures showing stocks of 590,700 Spanish long tons on September 30. The trade estimated those stocks as about equal to Cuba's contractual obligations to the Socialist countries.

The International Sugar Council held its thirteenth session in London on November 1. Thirty-seven countries attended. Regarding the world sugar situation, the Council released the following in a Press Communique:

"The Council considered preliminary estimates of the world market situation for the year 1963. It adopted an estimate made by its Statistical Committee of the minimum net import requirements of the free market for 1963 amounting to 11,523,000 metric tons raw value. The Council noted that the import requirements of the United States of America from foreign sources were estimated at 3,630,000 metric tons, raw value, making a total for the requirements of the world market of 15,155,000 metric tons, raw value. Details will be published shortly. The Council also considered the supplies of sugar likely to be offered on the total world market in 1963 and endorsed the opinion of its Statistical Committee that present indications suggest that there will be a close statistical balance between supply and demand in 1963.

"The Council had a preliminary and useful discussion of arrangements for the negotiation of a 1963 International Sugar Agreement to succeed the 1958 Agreement upon the latter's expiry on 31 December 1963 and agreed that the matter should be further discussed at its next session. Governments were invited in the interval to bring their attention to bear upon the problems involved in establishing an effective International Sugar Agreement.

"Preparations were made for the early publication of the Council's study 'The World Sugar Economy - Structure and Policies.'"

"The Council adopted a programme of work on the promotion of sugar consumption."

"The Council unanimously elected Dr. H. J. Scharmer, of the Federal Republic of Germany, as its Chairman, and Mr. Frederico Patino, of Mexico, as its Vice-Chairman for 1963."

ADMINISTRATIVE ACTIONS RELATING TO SUGAR SUPPLIES FOR  
1962, AND BEING CONSIDERED FOR 1963

Continuation of Sequence following Sugar Act Amendments in July 1962

Two supply actions have been taken since the last Sugar Reports went to press, details of which are shown below:

1. 200,000 Tons of Sugar Quota Deficits Reallotted: (November 1, 1962)

The U. S. Department of Agriculture today announced approval on Oct. 31, 1962, of applications by importers covering the 200,000 tons of sugar quota deficits which were announced Oct. 25 (press release USDA 3763-62).

The applications covered individual cargoes of sugar scheduled to be imported from Western Hemisphere countries and were approved in the order of the scheduled date of arrival of the sugar in the United States.

The approximate quantity approved for importation from individual countries follows:

<u>Country</u>	<u>Short tons, raw value</u>
Brazil	70,000
British West Indies	25,000
Costa Rica	3,000
Dominican Republic	44,000
Ecuador	31,000
French West Indies	2,000
Haiti	4,000
Peru	21,000

The announcement Oct. 25 stated that applications covering sugar for arrival after Dec. 15 would not become eligible for consideration until Nov. 6. Since applications have been approved covering the entire 200,000 tons, applications covering sugar for importation within this quantity after Dec. 15 cannot now be considered for approval.

2. Establishment of 1963 Sugar Requirements and Quotas Being  
Considered: (November 27, 1962)

---

Secretary of Agriculture Orville L. Freeman today announced that the U. S. Department of Agriculture is considering:

- (1) A determination of sugar requirements and the establishment of quotas for the calendar year 1963 totaling 9,800,000 short tons, raw value,
- (2) The authorization for purchase and importation during the period January-May 1963 of 750,000 short tons, raw value, of global quota sugar, and
- (3) The establishment of an import fee of 1.80 cents per pound on sugar imported within the global quota. Import fees applicable to sugar imported within specific country quotas would be 0.36 cents per pound on raw sugar and 0.56 cents per pound on direct-consumption sugar.

The 750,000 tons of global quota sugar which would be authorized for importation during the period Jan. 1 - May 31, 1963 would be allocated under terms similar to those applicable in 1962; that is, foreign countries would be invited to submit proposals to supply sugar during this period and to state the extent to which they will purchase U. S. agricultural commodities with the net receipts from the sale of the sugar. Proposals submitted on or before Dec. 20, 1962, would be considered simultaneously.

Factors being considered by the Secretary are set forth in a Notice of Proposed Rule Making which is scheduled for publication in the Federal Register Dec. 1. All persons are provided the opportunity to submit written data, views, or arguments prior to Dec. 5, 1962.

The substantive portion of the Statement of Bases and Purpose contained in the notice of proposed rule making, which is set forth in form and language appropriate for issuance as a final order if adopted by the Secretary, follows:

"During the 12-month period ended October 31, 1962, distribution of sugar for consumption in the continental United States totaled 9,711,000 short tons, raw value. Inventories of sugar in the hands of food processors, wholesalers and retailers are believed to have increased during this period in which case actual consumption would have been less than the quantity distributed. Allowing for this on the one hand and on the other for normal increases in consumption due to the increases in population and for refining losses, the quantity of sugar needed in the calendar year 1963 is expected to approximate 9,800,000 short tons, raw value.

"Refiners' inventories of quota sugar at the end of 1962 are expected to be slightly higher than at the end of 1961 and significantly higher than those held at the end of other recent years. It is essential that these inventories be maintained at present or higher levels to assure an uninterrupted flow of supplies to consumers.

"Prices for sugar in recent months have been within a range of 6.35 to 6.55 cents per pound and the quotations on the New York Coffee and Sugar Exchange for contracts for delivery in the early months of 1963 have also been within this range.

"Since the United States is not in diplomatic relations with Cuba, the provisions of Sec. 202(c)(4) of the Act preclude the establishment of the proration for that country of 1,654,341 short tons, raw value. Of that quantity 150,000 short tons, raw value, is allocated, 130,000 tons to the Dominican Republic and 20,000 tons to Argentine in accordance with Sec. 202(c)(4)(b) of the Act and the President's Proclamation 3485. Of the remaining 1,504,341 short tons, raw value, 750,000 tons is herein authorized for purchase and importation from any country that is a net exporter of sugar and with which this country is in diplomatic relations. Provision is made to authorize for purchase and importation during the period January-May 1963 the 750,000 tons on the basis of proposals to be submitted by foreign countries on or before December 20, 1962, to give special consideration to countries purchasing United States agricultural commodities. Any part of the 750,000 tons not authorized pursuant to such proposals may be authorized on the basis of the order of eligibility established in Part 817 of this Chapter.

"Based on expected price relationships, it is hereby found that a fee of 1.80 cents per pound, raw value, will approximate the difference between the market price for raw sugar (adjusted for freight to New York

and most-favored-nation tariff) eligible for importation into the United States from foreign countries within the quantity provided pursuant to Sec. 202(c)(4) of the Act and the price for raw sugar at a level that will fulfill the domestic price objective set forth in Sec. 201. Accordingly, as a condition for the importation of sugar within the quantities and quota prorations established in this regulation, fees are provided of 1.80 cents per pound for the quantity authorized for importation from foreign countries as a group pursuant to Sec. 202(c)(4) of the Act; 0.36 cents per pound for raw sugar authorized from individual foreign countries within quota prorations established pursuant to Sec. 202(c)(3) of the Act; and 0.56 cent per pound for direct-consumption sugar authorized for importation within the limitations established pursuant to Sec. 207(e)(2) of the Act."

See page 10 for details of proposed quotas and prorations.

Proposed 1963 Sugar Quotas and Prorations

Area or Country	: Quotas and Prorations :	: Direct Consumption Limit :
Short tons, raw value		
Domestic Beet Sugar	2,698,590	no limit

OTHER ADMINISTRATIVE ACTIONSDate announcedNature of action

October 30,  
1962

Modification of regulations to permit sugar testing above 99 degrees by the polariscope to be imported within specific country quotas and deficit allocations during the balance of 1962 as raw sugar for further refining. (See November 3, 1962 Federal Register).

October 31,  
1962

Commitment of 19,000 acres of the National Sugarbeet Acreage Reserve to farmers in the California counties of Fresno, Kings, Madera, and Tulare for the 1963 crop. The Department also announced that it is continuing its study of requests for reserve acreage for new plants scheduled for operation in 1964, and for expansion of existing sugarbeet processing facilities. (See November 3, 1962 Federal Register).

November 1,  
1962

Determination of fair and reasonable prices for the 1962 Florida sugarcane crop. (See November 6, 1962 Federal Register).

November 19,  
1962

A series of public hearings on wage rates and prices for the 1963 crop of sugar beets in States other than California. The hearings will be held between Dec. 7 and Dec. 12 in cities within major producing regions of the sugar beet area.

The schedule of meetings follows:

At Denver, Col., Dec. 7, in the Century Room, Cosmopolitan Hotel beginning at 9:30 a.m.

Date announcedNature of action

November 19,  
1962 (cont'd)

At Fargo, N.D., Dec. 10, in the Student Lounge Room, Library Building, North Dakota State University, beginning at 10 a.m.

At Detroit, Mich., Dec. 12, in the Cass Room, Pick-Fort Shelby Hotel, beginning at 9:30 a.m.

The series of hearings will be considered as one hearing, and testimony at each place will constitute a part of the same record. Persons may present testimony at any of the designated places. (See November 21, 1962 Federal Register).

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. October 1962 sugar deliveries for continental U. S. consumption, 830,000 short tons, raw value (preliminary) down about 20,000 from September 1962 but up 40,000 tons from October 1961. January-October 1962 deliveries 8,156,000 short tons, raw value, up about 101,000 tons from the January-October 1961 period. Final data for September 1962 deliveries 850,000 - same as previously published preliminary.

2. Primary distributors' stocks November 3, 1962 were 1,211,355 short tons, raw value (preliminary) down 50,000 tons from a year earlier but up 375,000 tons from end September 1962. During October beet processors' stocks increased by about 415,000 tons, mainland sugarcane processors' stocks by about 19,000 tons; refiners' stocks decreased by about 52,000 tons, and importers of direct-consumption stocks by about 7,000 tons.

3. Charges to quotas January 1 to November 16, 1962 were 8,877,175 short tons, raw value, leaving a balance of 1,077,115 tons to be supplied within the 10,000,000 tons total, of which 58,995 tons may be filled with direct-consumption sugar.

4. Regionally, January-September deliveries, 1962 as compared with 1961, were up to 3 regions and down to 2 -- Increases: Western 3.1 percent, South 0.6 percent, North Central 0.3 percent; Decreases: New England 2.2 percent, Middle Atlantic 0.3 percent.

1/ Includes quota deficit reallocations announced November 1, 1962.

2/ Domestic beet and mainland cane sugar marketings partly estimated; all other sugar entered, authorized for entry or set aside as of October 31, 1962.

3/ Despite deficits declared, full quotas remain available as follows: Domestic beets, 2,795,769; Mainland cane, 944,231; Hawaii, 1,110,000; and Puerto Rico, 1,140,000; and Virgin Islands, 15,000.

4/ In addition, 231 tons of raw sugar and 21 tons of direct-consumption sugar were brought in for subsequent return to Puerto Rico.

5/ Unfilled balance expired June 30, 1962.

6/ Basic quotas 533,805 tons and deficit allocations 701,044.

7/ Includes raw sugar for direct-consumption from Haiti, 1,175; Puerto Rico, 2,200.

1/ Spot prices during 1956-60 were for sugar in bags under Contract No. 6 plus .50 cent per pound duty (Cuban). Beginning with 1961, spot prices are for bulk sugar under Contract No. 7, the terms of which are duty paid or duty free.

2/ Spot prices during 1956-60 based on No. 4 Contract which was for bagged sugar F.A.S. Cuba. Beginning with 1961 spot prices are those under No. 8 Contract which is also for bagged sugar but F.O.B. and stowed at Greater Caribbean ports (including Brazil).

3/ For 1956-60 these amounts are the difference between the spot prices of the No. 6 "Domestic" Contract rolled back to Cuba (minus freight and insurance) and the spot prices of the No. 4 "World" Contract. Beginning with 1961 the No. 7 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢) computed freight, insurance and unloading charges, and adding the bag allowance (currently .04¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100 pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepay" and deduct discounts and allowances. For illustration see Sugar Reports 81, January 1959, pages 5 to 9.

5/ 11-Month Average.
